Direct Access. Instant and effortless.

Enjoy effortless heat adjustments with Direct Access. Instead of tapping several times to increase the heat, you can now tap the number directly for the right amount of heat. Instantly.

Quicker heat for extra speed

No more waiting around for pots to boil. The PowerBoost button gives you an instant burst of heat that boils water in under 90 seconds* – that's even faster than an electric kettle. It's perfect for tasks like boiling potatoes, and other quick cooking jobs too, like searing meat.

Total control over cooking time

The adjustable timer (max. 99 minutes) will remind you of the cooking time. It can also be used as a minute minder when the burners are not in use.

Clean as you cook

Because the surface around the pans stays cool as you cook, you can get rid of spills as you go along. Nothing gets burnt on, and there's nowhere for dirt to hide. So it's easy to keep the hob area looking pristine – even while you're still cooking.
